

Java

```
class Solution {  
    public int[] smallestTrimmedNumbers(String[] nums, int[][] queries) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string[]} nums  
 * @param {number[][]} queries  
 * @return {number[]}  
 */  
var smallestTrimmedNumbers = function(nums, queries) {  
  
};
```

C++

```
class Solution {  
public:  
    vector<int> smallestTrimmedNumbers(vector<string>& nums, vector<vector<int>>& queries) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int[] SmallestTrimmedNumbers(string[] nums, int[][] queries) {  
  
    }  
}
```
